WORK EXPERIENCE

JP MORGAN CHASE

Bengaluru, India | Jan 2023 – Present

SDE II

Jan 2026 – Present

- Developed a **Next.js-based data platform portal** for data pipelines, enabling client self-service ingestion workflows and data asset management, **reducing engineering onboarding effort by 40%**.
- Designed and scaled **multi-cloud data ingestion pipelines** using **AWS Lambda, ECS, and Databricks** to process **1M+ financial records daily**, ensuring high availability, low latency, and reliable data sync across downstream systems.
- Implemented **RBAC-based entitlements** to enforce secure access control across platform resources, supporting **100+ users and multiple role tiers**

SDE I

Jan 2023 – Dec 2025

- Created a **Storybook-based reusable React UI library**, increasing component reuse by **2×** and improving long-term maintainability of the portal frontend.
- Engineered an **LLM-powered SQL translator (Python & React)** that automated **100+ business data validation rules**, reducing dependency on engineering teams and improving rule adoption efficiency.
- Optimized a large-scale data pipeline handling a **20B+ record validation exception table** by introducing **table partitioning** to prevent full table scans and resolve concurrency-related failures.

Software Engineer Intern

June 2022 – July 2022

- Executed a **Java Spring Boot application** deployed on AWS ECS, reducing deployment time by **60%**.
- Curated a **DataDog monitoring dashboard** to track and optimize the health and performance of AWS Kubernetes clusters, reducing incident response time by **45%**.

EDUCATION

Bachelor's in Electronics and Computer Engineering

Punjab, India | Aug 2019 - June 2023

THAPAR INSTITUTE OF ENGINEERING AND TECHNOLOGY

CGPA : 9.20

PROJECTS

WAY FOR LIFE - NGO'S VOLUNTEER TRACKER 📄

REACT, MONGODB, EXPRESS, NODE

- Developed a **MERN-based** web application to streamline communication and collaboration between NGOs, volunteers, and organizations, **reducing manual tracking efforts by 75%**.
- Facilitated volunteers to register in a seamless manner for events and empowered NGOs with **real-time participation tracking**, leading to a **30% increase in participation and event engagement**.

DBOT - DSA PROGRESS TRACKER 📄

NEXTJS, FLASK, GENAI

- Built a **GenAI-powered** chat app using **LLaMA 3 (Next.js + Flask/Node)** to enhance interview preparation tracking, task planning and and boost **daily productivity**
- Engineered persistent data storage with MongoDB, enabling the chat application to **retain 95% of user data** across sessions, and improving recall of personalized LeetCode suggestions and bot interactions.

SKILLS

Languages: C++, Java, Python

Backend: Spring Boot, Microservices, AWS Lambda, AWS ECS

Frontend: React.js, Next.js

Databases: MongoDB

Services: Databricks, Spinnaker, Terraform, Datadog

ACCOMPLISHMENTS

- AWS Certified Cloud Practitioner
- Won 1st place in a 24-hour hackathon at JPMC
- Delivered a lecture on "YAML Reusability" at DevOps Forum
